DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 30 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 30 recites the limitation "claim 1" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 27, 29-37 and 42-44 are rejected under 35 U.S.C. 102(a) as being anticipated by Pozzobon (EP 0559179 A1).

Pozzobon discloses the claimed roller skate carriage including a pivoting mounting arm (near reference number 13 in figure 1) for each wheel and a torsion spring (near reference 10 in figure 1, near reference 17 in figure 2) acting about the pivot axis of the trailing arm and where the wheel follows a predetermined non-linear path.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 27-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perlin (WO 97/05931) in view of Pozzobon (EP 0559179 A1).

Perlin discloses the claimed carriage for a roller skate including a pivoting mounting arm (see figure 3 near reference 38) for each wheel and a spring (near reference 42, see also page 5, line 12) acting about the pivot axis of the trailing arm and where the wheel follows a predetermined non-linear path. Perlin discloses the claimed device except for a torsion spring and an adjustable abutment stop. Pozzobon discloses that it is known in the art to provide a helical, coil torsion spring for durable wheel constraint. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the carriage of Perlin with the helical, coil torsion spring of Pozzobon, in order to provide a durable wheel constraint.

Regarding claim 41, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the abutment stop (56) of Perlin with adjustability to accommodate wear and also to adjust the firmness of the skate to the users desired performance.

Response to Arguments

5. Applicant's arguments with respect to claims 27-44 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elaine Gort whose telephone number is (703)308-6391. The examiner can normally be reached on Monday through Thursday from 7:00 am to 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Olszewski, can be reached at (703)308-5183. The fax phone number for the organization where this application or processing is assigned is (703)872-9326.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-1113.
